

Microprocessor System Lab11 Check List

- **Date:** 2024/12/10
 - **Please follow the instructions, and report to TAs after finishing check points.**
 - **If you have any questions or troubles during the experiment, please feel free to ask TAs or the teacher, discussion with classmates is also encouraged.**
 - **Please refer to the content from class slides, you can also use the resources from the internet.**
-

Part I. Question

Please refer to the class content and answer the following questions.

Check Points:

- 1.1:** Please indicate the code where the sound amplitude is set.
- 1.2:** Please indicate the code where the note latency is set.
- 1.3:** Please explain how to choose the `audio_length`.

Part II. Example Project

Please refer to the source code on the google drive and execute it to see the results. Follow the same steps as in the last lab to burn the program to WE-I and try to play the music using the speaker.

Check Points:

- 2-1:** Run the example, and understand how the programs work.

Part III. Practice

Please refer to the source code on the google drive and modify it to meet the requirements of the practice.

Check Points:

- 3.1:** Please slow down the song by 1/3. (**Suppose** a note is played for 3 seconds, extend its duration to 4 seconds.)
- 3.2:** Please make the second half of the song be played at half volume of the first half.

Hint:

Please remember to adjust the `audio_length` to ensure that the entire song is played.
